## Trampoline Pad Instructions

This pad has two fixing systems, please use them both and attach correctly for best results.

- 1) Attach elastic strap, found in the centre of each section of pad, by the hook to “v” rings that attach to the springs and jump mat.

- 2) Using the elastic toggles supplied in the bag to thread them through the black loops found under the padding in the “corners”, where the padding folds and attaching them to the top rail of the trampoline.
